1 MR. P. ST. JOHN: Good afternoon. Thank you. I am bearing 50 or more pages of signatures from the public, some of which I know personally, which are signatures that ask that Yucca Mountain not be used as a high-level nuclear waste dump. These signatures are from some people who have three -- two and three degrees. They are part of the public who suffer from general hysteria, people who supposedly don't know what they are doing signing against this.

And this is merely an emotional response to a situation. It is not scientific based as defined by the DOE, but it is what the voice of the people would like to have heard.

Thank you.

DR. LAWSON (Facilitator): Mr. St. John, could I ask you give your full name for the record, please.

MR. PAC ST. JOHN: Yes. My nickname is Pac, P-a-c, and my last name is St. John, and I have decided that I am going to send this registered mail.
